## PROJECTS

### REELaxation

REELaxation is a web-based platform designed to help users unwind through fun games, uplifting reels, and mood-based activities. It includes features like mood detection using AI, interactive mini-games, and a soothing UI for stress relief. By combining entertainment and technology, it aims to promote mental well-being in a playful and engaging way.

Tech Stack: HTML, CSS, Javascript, OpenAI GPT, Hugging Face Transformers

### SMART INTERVIEW PREP BUDDY

Smart Interview Prep Buddy is a web app that helps users practice for job interviews through quizzes. It tracks user progress and shows reports to help them improve.

Tech Stack: Python, MongoDB, Django

### CARE CONNECT

Care Connect is an AI-driven, multilingual healthcare chatbot developed for the Odisha Government to enhance public health accessibility. It offers symptom checking, vaccination reminders, maternal care guidance, and real-time outbreak alerts through voice, text, and avatar-based interactions. Built with Flask, LangChain, MongoDB, Chroma DB, and OpenAI models, it bridges the gap between citizens and healthcare services—especially in rural regions—by promoting disease awareness and preventive care.

Tech Stack: HTML, JavaScript, Flask, TailwindCSS, MongoDB, LangChain, OpenAI

### Online Fee Payment and Receipt Management System

The Online Fee Payment and Receipt Management System is a web-based platform designed to simplify fee transactions for educational institutions. It enables students to securely pay their fees online, generate instant digital receipts, and view transaction history anytime. The system automates administrative processes by managing student records, tracking payments, and providing analytics dashboards for staff. With features like email/SMS notifications, secure payment gateways, and real-time receipt generation, it ensures transparency, efficiency, and convenience for both students and administrators.

Tech Stack: HTML, CSS, JavaScript, Spring Boot, MySQL, JSP, Hibernate
